# International Exhibition Center ART-SPACE

## A new space for art

The ART-SPACE is a modern space located in the center of Moscow (9 Tverskaya Street), created for art. This complex offers a unique platform for artists from around the world and creates a truly interactive experience for visitors.

## A diverse ecosystem

The ART-SPACE is a contemporary art center that offers spaces for exhibitions, discussions, fashion shows, immersive performances, digital installations, private film screenings, and music events.

The complex also includes the Art-shop and the Art-café "ATMOSPHERE", creating a complete ecosystem for art enthusiasts.

# ART-SPACE's Mission and Vision

## Creating a Unique Space

Our goal is to create an innovative and inspiring space where people can engage with contemporary and classical art from around the world.

## Supporting Artists

We are committed to providing a platform for talented artists to express themselves and reach a wider audience, promoting their creativity and professional development.

## Cultural Education

ART-SPACE shares the rich cultural heritage of different countries through innovative exhibition projects, fostering international dialogue and mutual understanding.

# Technological Innovation in Artistic Spaces

## Augmented Reality (AR)

AR technology allows visitors to access hidden layers of information within works of art. In the "World and Symbols" exhibition, these technologies reveal the historical and cultural significance of the symbols, making them more comprehensible.

## Virtual Reality (VR)

VR devices create an immersive space with living, dynamic prototypes, connecting the public to the "collective unconscious" and allowing them to truly integrate into the symbolic world of different cultures.

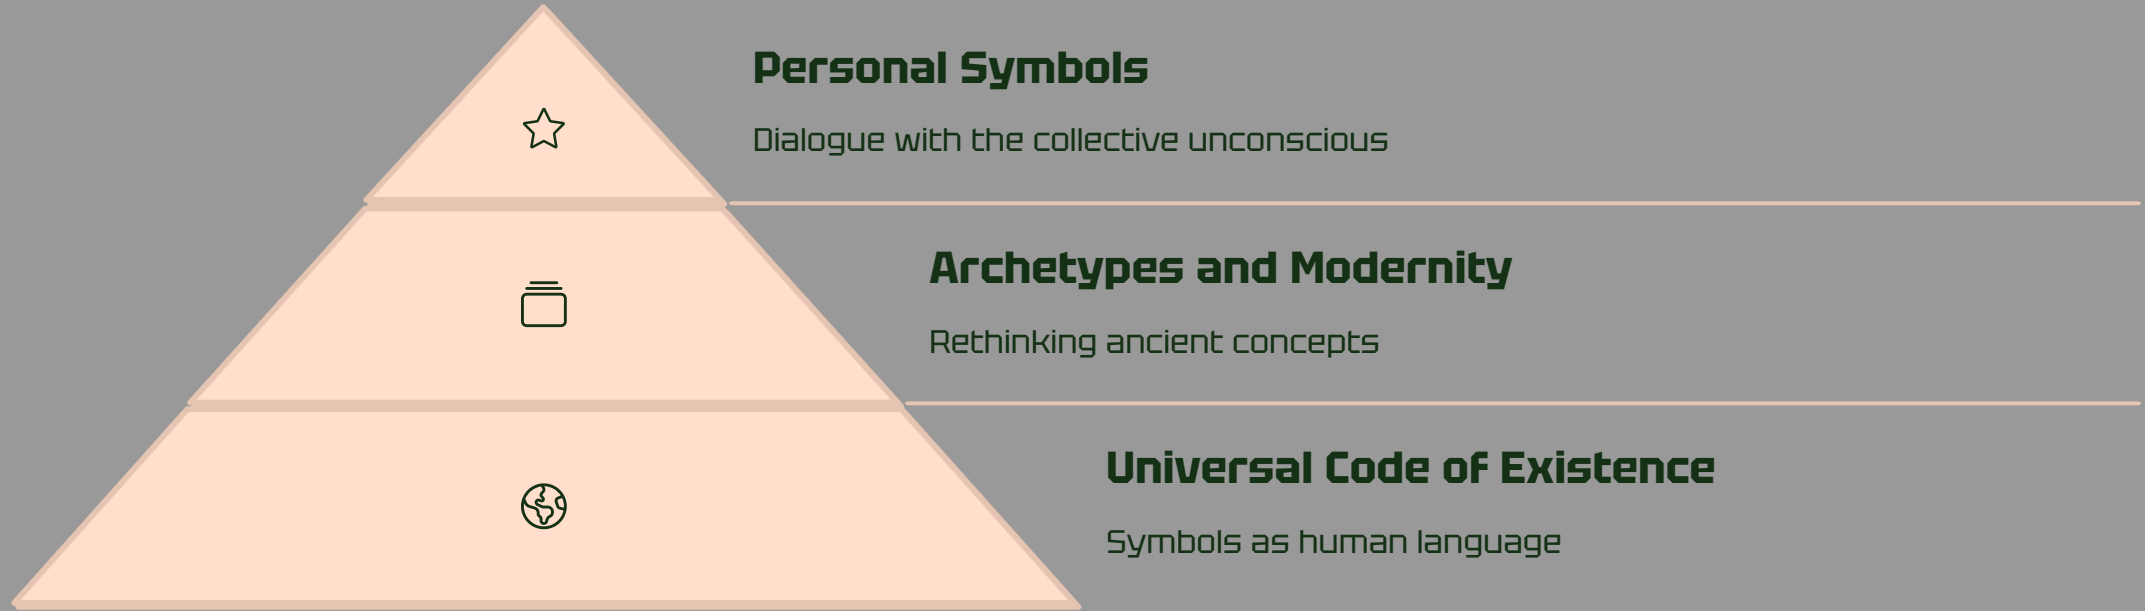

## Interactive Experience

Our model is different from traditional museums, as through unique technological resources, it allows for a more in-depth, personalized, and unforgettable interaction between people and art.

# "World and Symbol" Exhibition - Concept

The "World and Symbols" exhibition (04.03-21.03) explores how symbols shape our perception of the world, acting as a universal language to express complex ideas, emotions, and spiritual concepts across different cultures and eras.

The exhibition presents works by artists who focus on ancient archetypes and mythological symbols, rethinking their meaning in the context of contemporary reality, technological and global challenges, and creating their own symbolic systems.

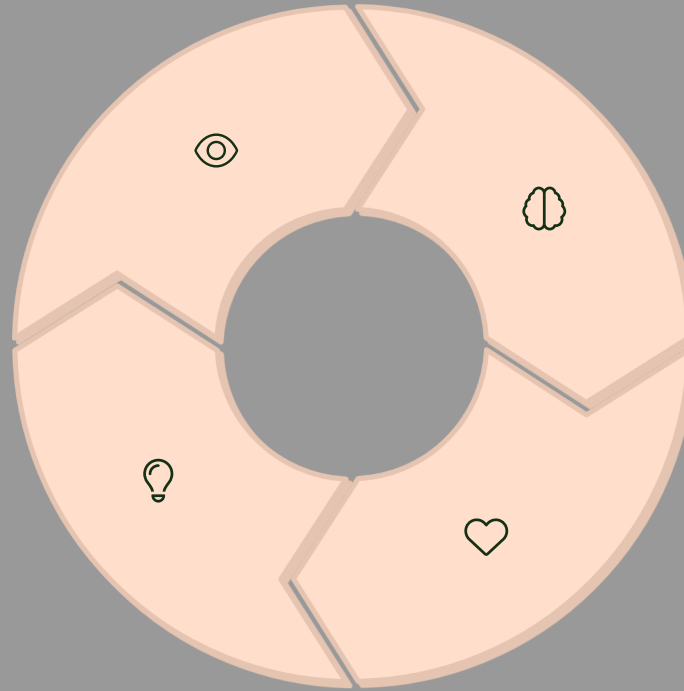

# The Environment of Philosophical Dialogue

## Visual Perception

Immersed in the aesthetic experience of the symbolic world

## Spiritual Illumination

Touch the collective unconscious

## Intellectual Reflection

Analyze and interpret the meaning

## Emotional Reaction

Establish a personal connection with universal archetypes

The exhibition creates a philosophical and symbolic environment, exploring the "universal language" of symbols that shape our perception. It is the space for dialogue between personal experience and the "collective unconscious".

The artworks are imbued with symbolism, exploring ancient archetypes, mythological images, and personal symbol systems. The visual elements of the exhibition include universal symbols such as yin-yang, anchor, dreamcatcher, all integrated into unifying themes of the human experience.

# The Importance of the Global Symbols Exhibition

1

## Philosophical Depth

This exhibition explores philosophical concepts in depth, which are a key element of the ART-SPACE program.

## International Dialogue

This exhibition explores a unified symbolic language, connecting different cultures and fostering mutual understanding.

3

## Creative Platform

This project offers artists the opportunity to explore deep ideas about history, modernity, and human psychology.

## Strategic Value

Including this exhibition in the 2025-2027 plan adds important intellectual and philosophical depth to the ART-SPACE program.
