ART-SPACE International Exhibition Complex

A New Space for Art

ART-SPACE is a stylish space in the center of Moscow (Tverskaya, 9), created for the life of art. Our complex provides a unique platform for artists from around the world and creates a truly interactive experience for visitors.

Multifunctionality

ART-SPACE is a center of contemporary art, providing spaces for exhibitions, discussions, fashion shows, immersive performances, digital installations, private film screenings, and music events.

A Complete Ecosystem

The complex also houses the Art-shop and Art-cafe "ATMOSPHERE", creating a complete ecosystem for art lovers, where you can not only enjoy the exhibitions, but also acquire unique works of art.

Mission and Vision of ART-SPACE

Innovative Space

Our goal is to create an atmospheric innovative space for immersion in the world of contemporary and classical art from around the globe. We strive to unite diverse cultures and artistic traditions under one roof.

Support for Artists

We aim to provide a platform for talented artists to express themselves and reach a wide audience. ART-SPACE supports creative experiments and innovative approaches to art.

Cultural Education

ART-SPACE shares knowledge about the rich cultural heritage of different countries through innovative exhibition projects. We believe in the power of art as a tool for intercultural dialogue and mutual understanding.

Technological Focus in ART-SPACE

Modern Technologies

We are focusing on modern augmented [AR] and virtual reality [VR] technologies to create a unique experience of interacting with art. This exhibition is the culmination of our technological focus.

Code as an Artistic Medium

The exhibition demonstrates the potential of code as a new artistic medium for creating unique visual and conceptual worlds. Programming is becoming a tool for creative self-expression.

New Forms of Digital Aesthetics

The project explores new forms of digital aesthetics, immersive storytelling, and user interaction with the immaterial environment, expanding the boundaries of imagination and perception of art.

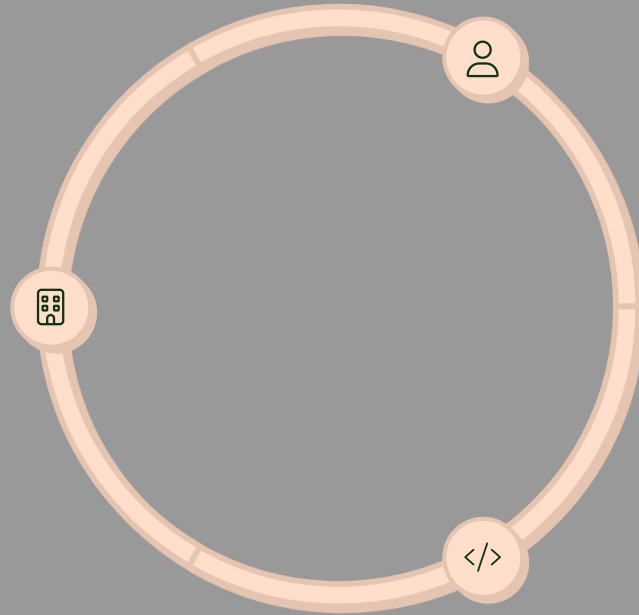

Concept of the "Virtual Worlds" Exhibition

Digital Spaces

Artists and designers present projects of virtual spaces, exploring new forms of digital aesthetics and immersive storytelling. Visitors will be able to explore architectural structures that are impossible in the physical world.

Avatar: Second Self

The exhibition is dedicated to the phenomenon of avatars and digital identities, exploring issues of self-representation, social interaction, and the psychological impact of virtual alter egos in the digital space.

Code as Canvas

Works created using algorithms, generative art, and artificial intelligence, demonstrating the potential of code as a new artistic medium for expressing creative ideas.

Immersive Atmosphere of the Metaverse

Futuristic Atmosphere

The exhibition creates a futuristic, digital, and immersive atmosphere. It feels like a step into the metaverse or a virtual world, where "the architecture of the impossible" and the nature of "digital identity" are explored.

Immersion in Digital Worlds

The artworks will consist of virtual space projects, avatar explorations, and generative art created with code and AI. Visitors will be able to interact with the exhibits and become part of the virtual worlds.

Creating Digital Identities

Special interactive installations will allow guests to create their own avatars and explore issues of self-identification in the virtual space, blurring the boundaries between real and digital existence.

Why This Exhibition Is Important

Technology and Innovation

This exhibition represents the pinnacle of ART-SPACE's commitment to technology and innovation. It directly fulfills the promise to use AR and VR to create a "unique experience" and distinguishes the complex from "traditional museums".

Philosophical Exploration

The project explores the most relevant "technological studies" and "philosophical concepts" related to digital existence. The exhibition raises important questions about the transformation of human experience in the digital age.

Landmark Event

This is a landmark event in the 2025-2027 program, strengthening ART-SPACE's reputation as a leading institution at the intersection of art and technology. The exhibition will draw the attention of the international community to the Russian art scene.
