Technological Focus in ART-SPACE

Commitment to Innovation

We are committed to leveraging modern augmented reality (AR) and virtual reality (VR) technologies to create a unique experience of interacting with art. Our model differs from traditional museums thanks to our unique technological capabilities.

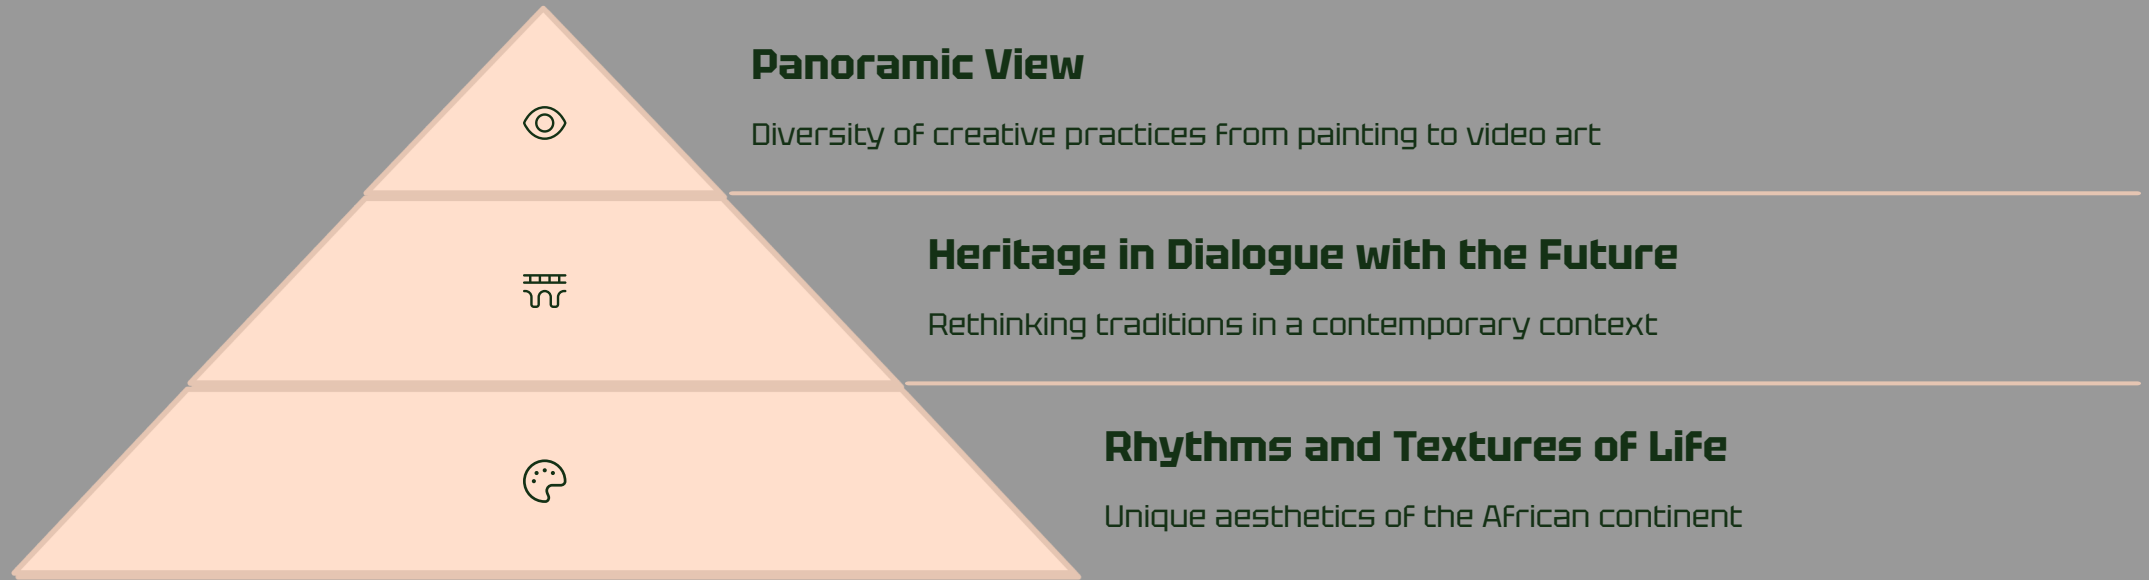

Immersion in Culture

At the "Contemporary Voices of Africa" exhibition, AR can be used to provide context about the mythology or traditional crafts that inspired the artwork. VR can immerse visitors in a virtual urban landscape or meditative landscape of the African continent.

Technologies become a bridge between the visitor and the art, allowing for a deeper understanding of the context and meaning of each work.

The Concept of the "Contemporary Voices of Africa" Exhibition

The exhibition presents a panoramic view of contemporary African art, showcasing the diversity of creative practices that reflect dynamic sociocultural changes. The artists explore the rich cultural heritage, creating a bridge between the past and the future.

The works convey the unique rhythms, colors, and textures of the African continent, exploring themes of identity, belonging, and everyday experience.
